

Proven Technology

Innovative Solutions

ABOUT TENACORE

Tenacore Holdings Inc provides high quality cost effective products and services to hospitals, clinics, surgery centers and third party providers throughout the world. Tenacore utilizes proven technology with innovative solutions within our design, engineering and manufacturing departments. Strategically, we offer our products and services direct and through our distribution network. This formula guarantees our customers the highest level of customer service and on time delivery in an ever competitive market.

Tenacore is committed to saving our customers time and money offering repairs or replacements for existing monitoring systems and medical equipment. Our knowledgeable staff is eager to assist you in making the correct cost saving solution that is best for your facility.

Tenacore Holdings Inc., is a unique company that was founded in 2000. Originally a distributor, we have transformed into a premiere medical manufacturing facility and repair depot supporting the medical community throughout the world. Within our 15,000 sq. ft. facility we have 26 technical stations, two class 7 clean rooms, 7 injection molding machines, a complete tool room with CNC, an engineering department and have achieved our ISO 13485 certification and FDA registration.

Tenacore is positioned to provide a one-stop solution for existing monitoring systems, regulators, endoscopes, modules and bedside monitors. We guarantee all products and services. Tenacore is committed to achieving customer satisfaction through zero defects, backed by our extensive warranty program. We will continue to serve this ever changing market by adding to our product line and by listening to our growing number of valued customers.

Thank you for your continued support,

The Tenacore Team
